Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Application includes:

Combination: magazine data storage element.

Subcombination 1 : frame.

Subcombination 2 : interconnector structure.

Subcombination 3 : label means.

Subcombination 4 : magazine transport.

Subcombination 5 : insertion/ejection device.

Subcombination 6: drive bay assembly.

Subcombination 7: power supply.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the above combination can be used without any particular subcombination. The subcombination has separate utility such as a system without any one of other subcombinations.

3. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such

Art Unit: 2652

claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include an election on a subcombination and point out the corresponding claims and any linking claims with the linked claims to be examined even though the requirement be traversed (37 CFR 1.143).
